

Your Fast Track To Learning!

SLOWGOLD UNLOCKS THE MUSICAL TREASURES IN YOUR CD COLLECTION!

SlowGold slows down, loops and transposes musical segments as short as a single note or chord. Learn virtually anything by ear whether you're a beginner or professional.

SlowGold's studio-quality slowdown algorithm and direct digital recording* let you hear the musical choices, techniques and phrasing of the masters in exquisite detail.

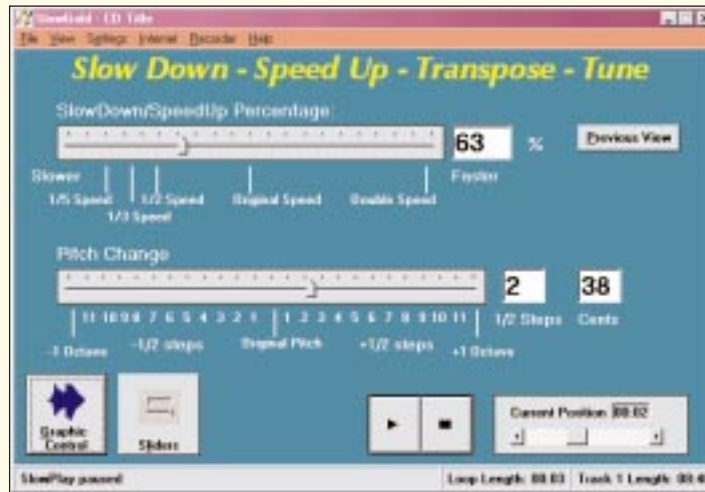

SlowGold was created by musicians for musicians.

SlowGold is built to the exacting standards of professional musicians. Anyone can learn to use it in just minutes. And it's fun!

- Studio-quality slowdown algorithm and direct digital recording ("ripping") reveal every nuance of the music
- Real-time slowdown and transposition allow you to work with musical pieces of any length without processing delay
- Simple interface – just drag the slider to stretch the music to as slow as 5% of the original without changing the pitch!
- Speeds up music so you can practice at speeds faster than performance tempo
- Change the tempo to any percentage between 5% and 200% of the original – not just a few speeds. This is critical for allowing gradual practice of physically difficult

passages. When you reach your maximum comfortable speed, you can increase the tempo by as little as 1% at a time to progressively develop your skills.

- Transposition feature allows singers to transpose recordings to their own key

- Fine-tuning lets you tune recordings to your instrument instead of the other way around!
- Learn music from any source – cassette, LP or even radio – using the built-in Recorder
- Slow down and transpose any .WAV or .MP3 file
- Graphic display makes it easy to create rhythmically exact practice loops
- Remembers everything you were working on – practice tempi, track names, comments, lyrics and chord names.
- Karaoke View scrolls large-sized lyrics synchronized to song playback – singers can stand at their microphones and sing along
- Print out interleaved chords and lyrics to

give to the rest of your band

- Extremely affordable for musicians and music students

The Critics Love SlowGold!

"SlowGold offers cool, user-friendly features and top-notch sound at a very reasonable price. If you're in the market for a transcribing tool, SlowGold is about as much bang for the buck as you'll find." – Guitar Player

"The best product [of its kind] I've seen to date."

– PC Magazine

"SlowGold has rendered all of my other transcribing tools obsolete. Nothing even comes close for quality and versatility. It eliminates all the guesswork and is helping my ear to reach its fullest potential."

This program is a godsend. Thanks, Woodshed!"

– Steve Gorenberg, Professional Transcriber

"TEN out of TEN" – BASS PLAYER OnLine

System Requirements: SlowGold requires Windows 95, 98, NT or 2000, a sound card or chip, 12MB of available disk space, and a 486/66 computer or faster. A Pentium 166 or better is recommended. Real-time slowdown and transposition requires a 300MHz Pentium or better.

*Requires a compatible CD-ROM drive. Almost all CD-ROMs made after 1997 and many manufactured prior to that are capable of digital recording.
